

Glass-Crete®

Removes concrete and mortar residue from glass surfaces.
Specially designed for the toughest construction cleanup projects.

Description

This product is a mildly acidic cleaner used to remove cement-based materials from glass surfaces without the use of scraper blades and without damaging the glass surface in the process. The formulation includes surfactants and builders that allow easy removal of the product with a brush and a squeegee. This product contains special polymeric lubricants that attach themselves to the minerals in the concrete material as well as the surface of the glass and help to lubricate and prevent the coarse concrete material from scratching the surface of the glass during the removal process. This product also leaves behind a microscopic protective coating that will allow the easy removal of any additional concrete that makes contact with the glass within three months of the application.

REVOLUTIONIZING THE BUILDING MAINTENANCE INDUSTRY

Specifications

Advantages

- Created by professional window cleaners in conjunction with chemists
- Prevents the need to use scrapers in many situations
- Easily neutralized by water
- Polymeric material bonds to concrete particles and helps to prevent scratching
- Installs protective coating to prevent further concrete contamination
- A safer alternative to conventional acids
- Makes the difficult and dangerous task of removing concrete easier
- Fast-acting
- Prevents the need for costly replacement of glass

Intended Use

This product is designed to be used on glass and anodized aluminum surfaces in construction cleanup projects.

Surface Preparation

Remove as much of the large concrete pieces and spatters as possible by chipping at the material with a tool. In some instances, the use of a pressure washer with a turbo tip will help to remove large pieces of concrete from the glass.

Application

This product will break down concrete and mortar, but only microscopic layers at a time. Large pieces will take longer to remove. Use a spray bottle to

apply product to the stained area on the glass. Lightly agitate with a soft bristle brush to loosen the concrete. Allow the product to remain on the surface until all residues are visibly removed. Use water to rinse, dilute and neutralize the cleaner on the glass and reveal the glass surface. Make sure to wet all adjacent surfaces such as precast and concrete prior to application of this product on glass. Do not allow this product to remain on any stone surfaces as it will stain. Repeat as many times as necessary to remove concrete residue.

If the concrete material has been left on the glass for an extended period of time, it

may etch into the glass causing damage that may not be repairable with this product. In this situation, use Presto's **Glass ReSurfacer®** System to polish and renew the glass.

Tip: Presto's **Glass Defender®** Series can be used on glass surfaces prior to concrete or masonry work that might allow concrete or mortar material to come in contact with the glass. The Glass Defender Series will protect the surface so that if concrete does attach to the glass, it can easily be removed by standard window cleaning procedures. The Glass Defender Series will also help to protect the glass from scratching if scrapers need to be used in the cleaning process.

Warranties

The information provided by Presto for the safe and effective use of this product, and all of our products, is believed to be good and accurate. However, due to the many different possible applications of this product, careful considerations should be made when selecting its suitability for each surface.

The information provided should never be substituted for individual testing to ensure the product's compatibility with each surface intended for use. The purchaser shall assume all responsibility for determining the suitability of this product. When used as intended, this product will perform as stated. No other warranty can be made for this product, verbally or written.

Presto warrants this product to be free from defects. In the event this product is found to be defective, we will provide a sufficient amount of product to replace the defective product.

Green Synergy Product

Presto's Green Synergy Products™ work synergistically with each other to protect all surfaces of a building without damaging Presto's protective coatings present on those surfaces. These products are designed to be the longest lasting protection available for preserving the appearance of buildings.

Green Synergy Products are designed so that they will not easily break down and leach degrading materials onto adjacent surfaces.

Green Synergy Products work to save you money. Listed on our website is a 10-year Return on Investment graph that depicts the long-term cost savings associated with using Presto's Green Synergy Products compared to competitive options that utilize older technology. More

About Presto

Presto Restoration Products was created to implement higher performing technology, safer practices and products that provide a better return on investment to the building restoration and maintenance industry. Our expertise is researching and developing products and techniques to restore and preserve the magnificence of high-rise buildings built with architectural glass, metal and stone surfaces.

Presto strives to design products that comply with the Green Building Standards Act, which promotes better environmental standards for the construction, rehabilitation and maintenance of buildings:

- Improve energy efficiency and increase generation of energy through renewable and clean energy technologies
- Increase the demand for environmentally preferable building materials, finishes and furnishings
- Improve the environment by decreasing the discharge of pollutants from buildings
- Create industry and public awareness of new technologies that can improve the quality of life for building occupants
- Improve the health and productivity of building occupants by meeting advanced criteria for indoor environmental quality

At Presto, we have mastered the art of balancing quality and compliance through our dedication to Building Product Synergy™ for a safer, greener environment.

Presto continues to perform extensive research, development and testing on various methods of commercial exterior restoration and preservation.

Product Availability

Glass-Crete is available in the following sizes:

1 Quart Bottle

12-Quart Case

555 North Point Center East
4th Floor
Alpharetta, GA 30022
