

Green-Kleen®

100% Residue-free Cleaner for All Architectural Surfaces

Description

Green-Kleen is a concentrated, environmentally friendly, biodegradable, multi-surface cleaner that utilizes hydrogen and ultra-pure water to provide the next generation in cleaning technology. This product is specially designed for glass, metal and stone surfaces treated with silicone sealers and protective treatments. Application is most effective when used with heated, deionized water. This product is designed for high-performance building restoration and preservation applications.

REVOLUTIONIZING THE BUILDING MAINTENANCE INDUSTRY

Specifications

Advantages

- Environmentally friendly
- Attacks stains caused by green algae and mold
- Evaporates completely
- Safe for indoor and outdoor use
- Leaves no stain-forming residue
- No odor
- Made with ultra-pure water
- Aggressive stain-fighting capabilities
- Contains no phosphates, petroleum distillates or solvents
- Undiluted product is non-flammable and non-combustible
- Solution doesn't contribute to smog formations or poor indoor air quality

Intended Surfaces

For use on stone, metal, glass and painted surfaces.

Coverage Rates

250 to 10,000 sq. ft. per gal. depending on the dilution rate

Dilution

Product can be diluted to any concentration needed.

Heavy Duty – This product may be used undiluted.

Medium Duty – Dilute 35-65% with water.

Light Duty – Dilute 10-35% with water.

Necessary Equipment

- Running water
- Chemical sprayer
- Deionized water tank (optional)
- Pressure washer (optional)
- Stone brush (optional)

Surface Preparation

Remove as much surface buildup as possible prior to using Green-Kleen.

Application

Clean the area first. We recommend heated, deionized water to remove surface buildup, and to rinse the

surface after product application. This product can be used with a pump sprayer or any chemical injection applicator. Apply Green-Kleen to the surface using a side to side wetting pattern starting at the bottom and working upward. Make sure to evenly and fully soak the surface. Allow the product to soak as long as possible without drying. Reapply the product if areas become dry. Rinse using a pressure washer or water hose. Remove all product from the surface. If heavy soils are present and it appears necessary, use a strong, short-bristled brush to agitate the surface.

When product is applied to surfaces with biological growth, a bubbling reaction will occur on the surface. Apply product until this reaction subsides. This will signify that the biological growth has been removed.

If necessary, apply a second or third treatment to the stone, and repeat the process as previously described. When finished, make sure to rinse the surface multiple times to ensure no residue is left behind – especially when a water repellent is to be applied afterwards.

This product will not harm the surface if used as directed and can be applied as many times as needed. The product will work without the use of deionized water; however, it is recommended for superior performance.

Situations including various stone types or different natured stains may require multiple products. Presto's stone cleaning line includes:

- **Stone Restore® HD**
For difficult to remove mineral stains caused by efflorescence, rusting, red clay, iron, and more
- **Stone Restore® NC**
For general cleaning of sensitive stone surfaces that require a neutral cleaner
- **Stone Restore® A+**
For heavy stains caused by oil, grease, grime and environmental pollution
- **Stone Restore® CT**
A multi-purpose stone cleaner that removes a variety of stains from all types of stone materials
- **Stone Restore® CB²**
For difficult to remove biological stains
- **Stone Restore® PS**
For stubborn surface contamination on all types of polished stone

Recommendations

We recommend the use of one of Presto's stone protective treatments to protect the newly restored surface for years:

- **Leach Stop®** – Mineral Leaching Mitigation Treatment™
- **ElaSticone®** – Silicone sealer for concrete, masonry and stone surfaces
- **ElaSticone® GSX** – Silicone with graffiti protection for concrete, masonry and stone surfaces
- **Protect-A-Stone®** – High-performance oil protection for stone surfaces
- **Stone Guardian®** – UV-resistant, breathable protection for superior water, oil and stain resistance
- **ReJuviSeal®** – Rejuvenating oil protection for stone surfaces
- **Stone Enhancer® Series** – Film-forming, acrylic-based protection for stone surfaces

Warranties

The information provided by Presto for the safe and effective use of this product, and all of our products, is believed to be good and accurate. However, due to the many different possible applications of this product, careful considerations should be made when selecting its suitability for each surface. The information provided should never be substituted for individual testing to ensure the product's compatibility with each surface intended for use. The purchaser shall assume all responsibility for determining the suitability of this product. When used as intended, this product will perform as stated. No other warranty can be made for this product, verbally or written.

Presto warrants this product to be free from defects. In the event this product is found to be defective, we will provide a sufficient amount of product to replace the defective product.

Green Synergy Product

Presto's Green Synergy Products™ work synergistically with each other to protect all surfaces of a building without damaging Presto's protective coatings present on those surfaces. These products are designed to be the longest lasting protection available for preserving the appearance of buildings.

Green Synergy Products are designed so that they will not easily break down and leach degrading materials onto adjacent surfaces.

Green Synergy Products work to save you money. Listed on our website is a 10-year Return on Investment graph that depicts the long-term cost savings associated with using Presto's Green Synergy Products compared to competitive options that utilize older technology. About Presto

Presto Restoration Products was created to implement higher performing technology, safer practices and products that provide a better return on investment to the building restoration and maintenance industry. Our expertise is researching and developing products and techniques to restore and preserve the magnificence of high-rise buildings built with architectural glass, metal and stone surfaces.

Presto strives to design products that comply with the Green Building Standards Act, which promotes better environmental standards for

the construction, rehabilitation and maintenance of buildings:

- Improve energy efficiency and increase generation of energy through renewable and clean energy technologies
- Increase the demand for environmentally preferable building materials, finishes and furnishings
- Improve the environment by decreasing the discharge of pollutants from buildings
- Create industry and public awareness of new technologies that can improve the quality of life for building occupants
- Improve the health and productivity of building occupants by meeting advanced criteria for indoor environmental quality

At Presto, we have mastered the art of balancing quality and compliance through our dedication to Building Product Synergy™ for a safer, greener environment.

Presto continues to perform extensive research, development and testing on various methods of commercial exterior restoration and preservation.

Product Availability

Green-Kleen is available in the following sizes:

5-Gallon Pail
