

Stone Restore[®] A+

Powerful Alkaline Concentrated Stone Restoration Cleaner

Stone Restore A+ removes stubborn, environmental staining and oil and grease stains.

Description

This product contains a combination of environmentally friendly surfactants, builders and solvents, which penetrate, lift and remove a variety of stains from stone surfaces of all types.

REVOLUTIONIZING THE BUILDING MAINTENANCE INDUSTRY

Specifications

Advantages

- Water-based
- Cuts through stubborn oil and grease stains
- Removes black environmental staining on multiple surfaces
- Effectively cleans painted surfaces
- Low odor
- Cost-effective
- Fast-acting

Horizontal or Vertical

This product is primarily used for horizontal surfaces as it is incompatible with glass and may cause stains if allowed to dry on the surface.

Intended Use

This product is designed for use on most types of stone. Do not use this product to clean limestone, marble or travertine.

Necessary Equipment

- Protective gear
- Running water
- Chemical sprayer
- Pressure washer (optional)
- Stone brush (optional)

Dilution

Stone Restore A+ should be used at a dilution rate of at least 3 to 1. For light stains, dilute 1 to 9 with water. For horizontal concrete with stubborn oil stains, start by using a 3 to 1 mix, then dilute as needed.

Surface Preparation

Protect unintended surfaces from contact, including traffic and pedestrian areas below the project, electric tools, wood, furniture, fixtures and plants. Always test in a small, inconspicuous area prior to use.

Application

Wet the surface prior to application. Have running water available to keep the surface damp. Apply an even coat of cleaner using a low-pressure (40 psi max.), chemical-resistant sprayer. Keep area moistened with Stone Restore A+ to loosen soil. Immediately rinse any unintended surfaces, such as glass or frames.

For deep stains, allow the cleaner to penetrate into the substrate for 10-20 minutes, but never allow surface to dry.

After product has saturated the surface, rinse using a pressure washer and a white, 40-degree tip or a green, 25-degree tip. Keep the tip as far away from the surface as possible. If a pressure washer is not available, use a brush to help loosen stubborn soils. Always rinse area thoroughly to ensure no product is left behind.

Multiple applications may be required for heavily soiled, porous or absorbent surfaces. Apply immediately after initial application. Follow the same instructions for each application. For best results, rinse with heated, deionized water.

Situations including various stone types or different natured stains may require multiple products. Presto's stone cleaning line includes:

- **Stone Restore® HD**
For difficult to remove mineral stains caused by efflorescence, rusting, red clay, iron and more
- **Stone Restore® NC**
For general cleaning of sensitive stone surfaces that require a neutral cleaner
- **Stone Restore® CT**
A multi-purpose stone cleaner that removes a variety of stains from all types of stone materials
- **Stone Restore® CB²**
For difficult to remove biological stains
- **Stone Restore® PS**
For stubborn surface contamination on all types of polished stone

Precautions

Take special precautions when using any alkaline cleaner. Stone Restore A+ may cause discoloration of stone or affect adhesion of water repellants if used incorrectly. Never let this product dry on surface. Product may cause etching on glass surfaces.

Recommendations

We recommend the use of one of Presto's stone protective treatments to protect the newly restored surface for years:

- **Leach Stop®** – Mineral Leaching Mitigation Treatment™
- **ElaSticone®** – Silicone sealer for concrete, masonry and stone surfaces
- **ElaSticone® GSX** – Silicone with graffiti protection for concrete, masonry and stone surfaces
- **Protect-A-Stone®** – High-performance oil protection for stone surfaces
- **Stone Guardian®** – UV-resistant, breathable protection for superior water, oil and stain resistance
- **ReJuviSeal®** – Rejuvenating oil protection for stone surfaces
- **Stone Enhancer® Series** – Film-forming, acrylic-based protection for stone surfaces

Warranties

The information provided by Presto for the safe and effective use of this product, and all of our products, is believed to be good and accurate. However, due to the many different possible applications of this product, careful considerations should be made when selecting its suitability for each surface.

The information provided should never be substituted for individual testing to ensure the product's compatibility with each surface intended for use. The purchaser shall assume all responsibility for determining the suitability of this product. When used as intended, this product will perform as stated. No other warranty can be made for this product, verbally or written.

Presto warrants this product to be free from defects. In the event this product is found to be defective, we will provide a sufficient amount of product to replace the defective product.

Green Synergy Product

Presto's Green Synergy Products™ work synergistically with each other to protect all surfaces of a building without damaging Presto's protective coatings present on those surfaces. These products are designed to be the longest lasting protection available for preserving the appearance of buildings.

Green Synergy Products are designed so that they will not easily break down and leach degrading materials onto adjacent surfaces.

Green Synergy Products work to save you money. Listed on our website is a 10-year Return on Investment graph that depicts the long-term cost savings associated with using Presto's Green Synergy Products compared to competitive options that utilize older technology. More information can be found at www.IsYourBuildingGreen.com

About Presto

Presto Restoration Products was created to implement higher performing technology, safer practices and products that provide a better return on investment to the building restoration and maintenance industry. Our expertise is researching and developing products and techniques to restore and preserve the magnificence of high-rise buildings built with architectural glass, metal and stone surfaces.

Presto strives to design products that comply with the Green Building Standards Act, which promotes better environmental standards for

the construction, rehabilitation and maintenance of buildings:

- Improve energy efficiency and increase generation of energy through renewable and clean energy technologies
- Increase the demand for environmentally preferable building materials, finishes and furnishings
- Improve the environment by decreasing the discharge of pollutants from buildings
- Create industry and public awareness of new technologies that can improve the quality of life for building occupants
- Improve the health and productivity of building occupants by meeting advanced criteria for indoor environmental quality

At Presto, we have mastered the art of balancing quality and compliance through our dedication to Building Product Synergy™ for a safer, greener environment.

Presto continues to perform extensive research, development and testing on various methods of commercial exterior restoration and preservation.
